Attn Jan

These are the notes made by the carbon footprint working group last friday  
Hope they make sense

- 1/ Regarding the bike racks this is ongoing as we don't at present have a small works contractor.
- 2/ The Scout hut lighting and timer for the heaters we discussed at the last meeting, the scouts have already done and **are** already making a saving
- 3/ Peter Moore suggested solar panels for the Scout Hut, we need to investigate viability
- 4/ Car charging points. New point of contact They are now investigating if the power supply from the VH will now suffice
- 5/ Re solar panels maybe VHC could apply for grants; PC could consider contributing toward costs
- 6/ Re cycling Need to get info from Sue
- 7/At the September meeting ask pc if we can purchase a projector
- 8/ Need to get carbon footprints from  
.Village hall  
Scout hut  
Mode  
For last 2 years

Regards  
Lyn
